You know that speed counts. We know it, too.

In the clinical world, you have to move fast. Even a small delay can affect quality of care. What if your cardiology PACS and reporting solution was smart enough to keep up with you?

Designed for usability and engineered for performance, the Studycast system offers speed, power, and flexibility in a single intuitive solution. Imagine having your whole workflow at your fingertips no matter where you go. View images and cine loops, document findings, and generate a structured report—all in your browser. **Anywhere. Anytime. Instantly.**

View and interpret with a powerful, comprehensive solution

- Zero-footprint synchronized quad viewer built for speed
- Smooth playback and responsive controls even with large echo loops
- Stress echo viewing protocols

- Quickly save frames from any loop and add them to the final report
- View images and loops on any Internet-connected device—even a mobile phone

Save time with automated features and a single intuitive workflow

- Study images, patient demographics, and measurements upload automatically and populate study-specific worksheets and study reports
- With automatic calculations, interactive diagrams, and quick compare to priors, you can build your report with fewer clicks
- Easily configure the worksheets with presets and customized findings statements

- Share images and reports quickly through a secure portal – no more printing or burning discs
- Receive notifications when studies are ready for you to read, send final reports to the referring physician, and even route the study to your EMR or billing system – automatically

coresound IMAGING®

Detailed templates and structured reports

- Echo
- Pediatric Echo
- Stress Echo (exercise and pharmacologic protocols)
- Fetal Echo
- Exercise Tolerance Testing
- Nuclear Cardiac
- Plus, a full vascular package at no additional cost

Packed with features designed specifically for cardiology

- Studycast Advisor™ offers recommendations based on ASE guidelines
- Interactive diagram for perfusion and function reporting with auto statement generation
- Automatic pediatric z-score calculation
- Approve normal echo reports in two clicks
- Auto BSA indexing with BSA- and gender-specific normal values
- Single portal for imaging studies and diagnostic tests, including Holter and EKG
- Reports designed to help you meet ICAEL, IAC, ASNC, and ASE requirements

Security and convenience with no additional IT burden

- No hardware to maintain, no software to update, and no data storage to manage
- Exceeds HIPAA and PIPEDA standards for privacy and data security
- State-of-the-art encryption
- Data replicated in two geographically disparate enterprise class Tier III+ data centers
- Monthly software updates are deployed automatically

And it comes with

- **Fast, easy implementation** – Be up and running in a couple of weeks
- **Unlimited training** – On day one or day one thousand
- **Unlimited live support** – Talk to our outstanding support team Mon-Fri, 9am-8pm ET
